# HarePoint Workflow Extensions

Over 200 activities for authoring SharePoint workflows of any complexity with SharePoint Designer and Microsoft Visio. Automate business processes without any annoying programming!

HarePoint Workflow Extensions provides over 200 new 'ready-to-use' activities for Microsoft SharePoint workflow development. The product is fully supported by all workflow development tools from Microsoft and allows you to create workflows of any complexity without a specialized framework.

No more migration and adaptation of existing workflows to a new development environment, and no need to master and deploy new development tools. You can benefit from the power of the product in SharePoint Designer 2010, Microsoft Visual Studio 2010, and in Microsoft Visio 2010.
